HML

Dear Sir,

Would you please be so kind
as to tell me who was in charge
of the technical, electrical Research
group that wanted to use this method
of "brain-washing" on Ruby, to prove
his innocence, prior to his death?

A doctor in Annapolis, Md.
was "paid off" to permit psychology,
electrical-reactor studies on me,
and he won't tell.

If I get the address + names
of the Research group, my doctor can
contact them + better know what was
done to me that is causing the
"undue influence", + use counteractive
treatment.

The reactions I have from this technology made it possible for me to know 6 days prior to his death, that Dave Ferrie had an artery that was weak & it would probably hemorrhage, and prior to Ruby's removal to the hospital, that he had a cancerous nodule.

I have written no less than 6 times to Mr. Jim Garrison in the past year & 1/2 & yet have not received an answer, so I am appealing to you.

My mail frequently is taken -- I feel sure, because friends say they write & I never get their letters.

Please advise I get your answer. Will gladly pay postage fee.

Very sincerely yours,
(Miss) Velma Aithon
